

General Purpose Concrete (GEN Series)

Ideal for domestic projects, small foundations and non-structural work.

Product name	Uses/benefits
GEN0 – Blinding Mix	For levelling and preparing ground before foundations. Cost-effective and easy to place.
GEN1 – Domestic Floor Mix	Ideal for shed bases, conservatories and internal floors. Smooth finish, light-duty use.
GEN2 – Oversite Mix	Stronger base for domestic builds. Best for ground floors and kerb bedding.
GEN3 – Heavy Duty Oversite	Higher strength, suitable for garage floors and heavier domestic loads.
GEN4 – High-Strength Base	For workshops and high-load areas needing extra durability.

Structural Concrete (RC & ST Series)

For reinforced concrete elements in domestic and commercial builds.

Product name	Uses/benefits
RC20/25 ST1 Light Structural	For small beams, slabs and retaining walls. Strong and versatile.
RC25/30 ST2 Standard Structural	The most common options for general structural work in the UK.
RC28/35 ST3 High-Performance Structural	Ideal for suspended slabs and commercial floors. Higher strength and durability.
RC32/40 ST4 Heavy Structural	For heavier load bearing elements. Excellent long-term performance.
RC40/50 ST5 High-Strength Concrete	Maximum strength for demanding engineering applications.

Designed Concrete (C-Class Mixes)

Performance-based mixes for customers who know the strength they need.

Product name	Uses/benefits
C12/15	Entry-level structural strength for light foundations.
C20/25	Popular for home builds. Ideal for domestic slabs and footings.
C25/30	For general structural work. Widely used and reliable.
C30/37	Suitable for heavier structural loads/commercial use.
C35/45	High abrasion resistance, ideal for industrial floors.
C40/50	For specialist high-strength applications.

Let's talk about how we can support your next project.
